RETHINK FOOD WASTE

Food waste is an epic problem

Food produced is never eaten

30%

Commercial food waste in India

115 Mn Tons

We transform
food into feed

We bring food waste
back into the food chain

WE PROVIDE

financially superior waste management
solution for food producers

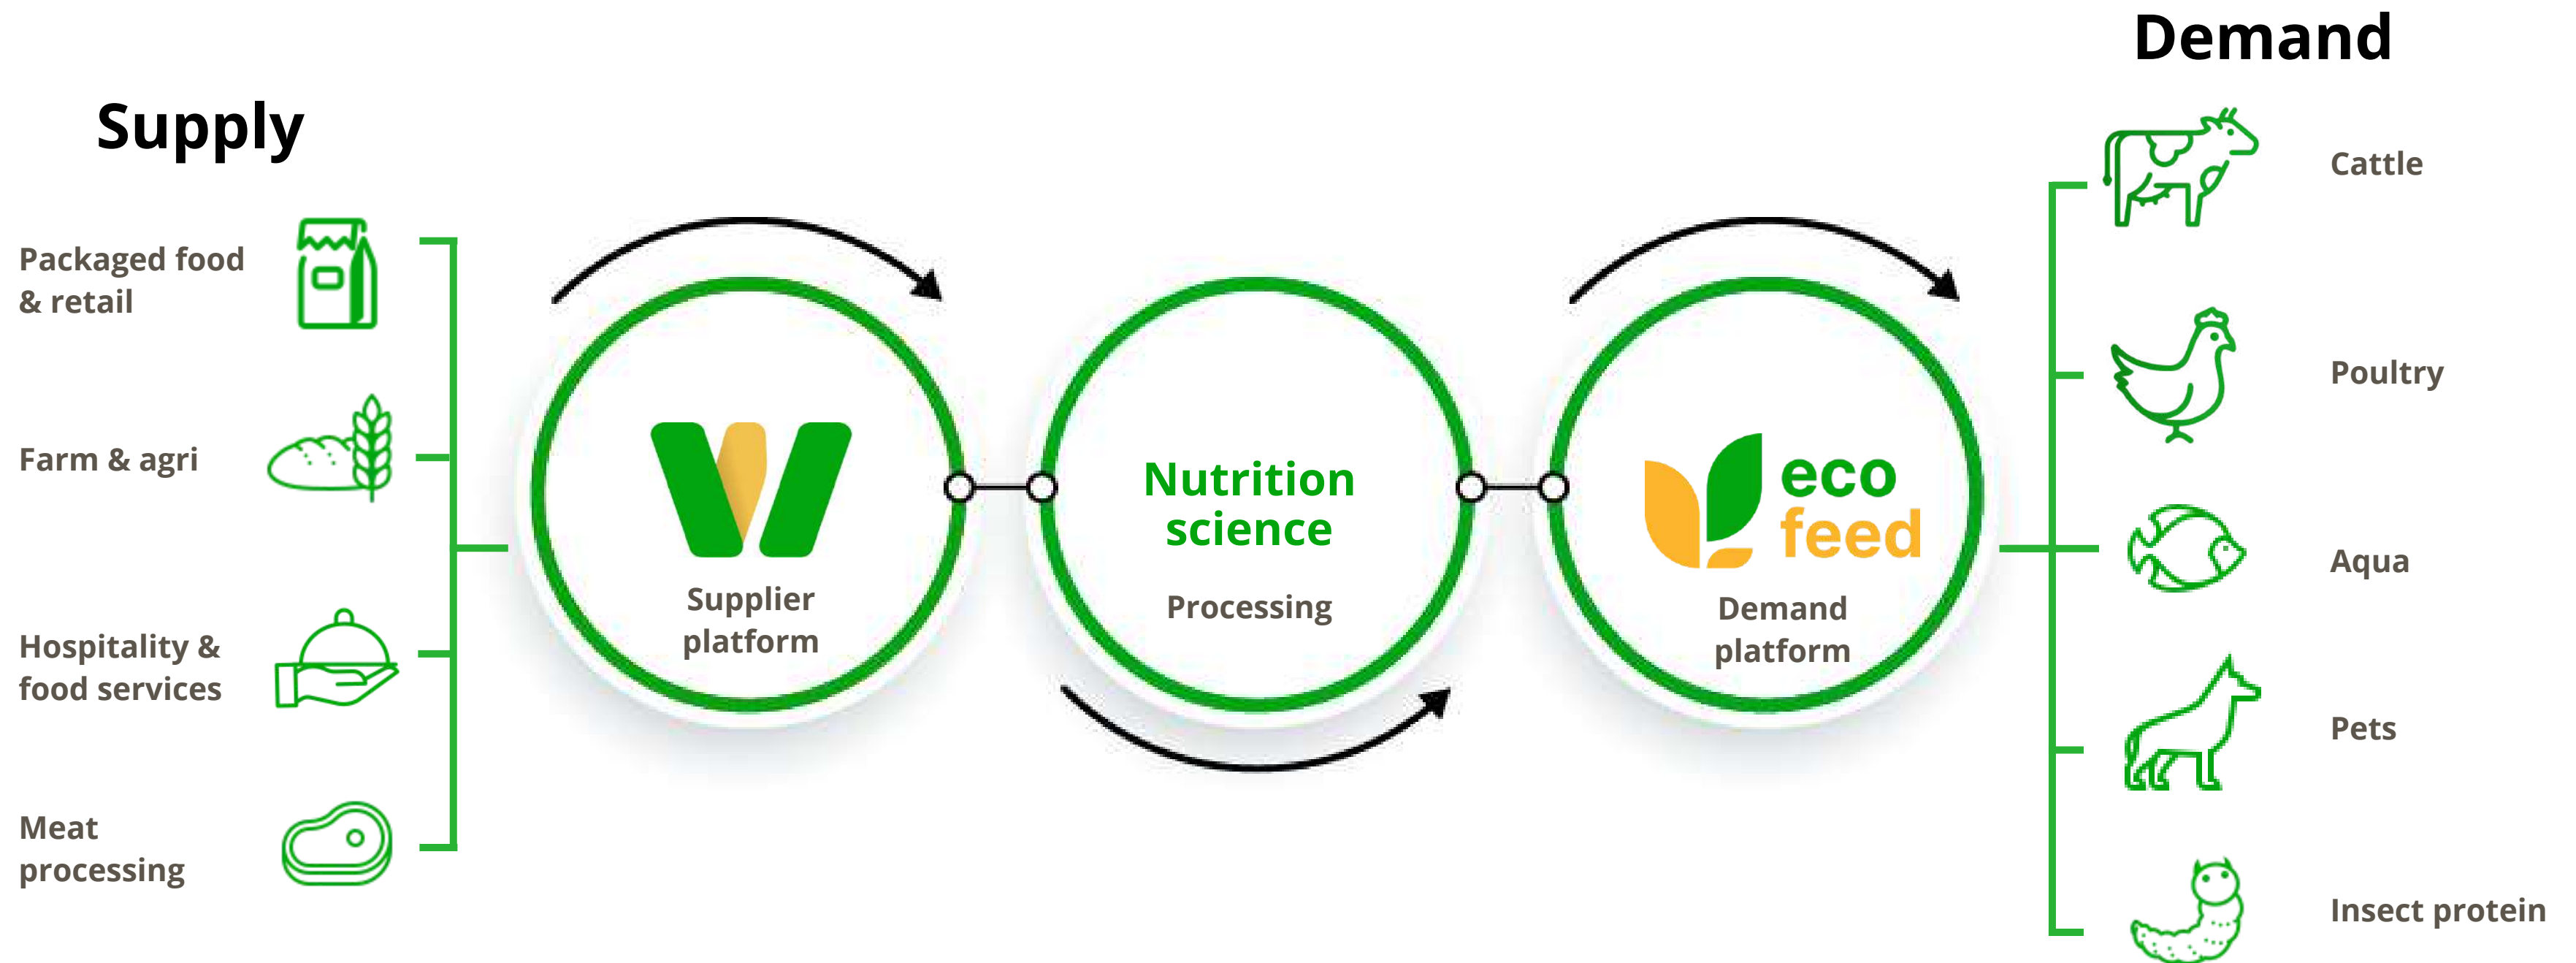

WE CHAMPION

a circular economy approach that solves
major nutrition concerns in the feed industry

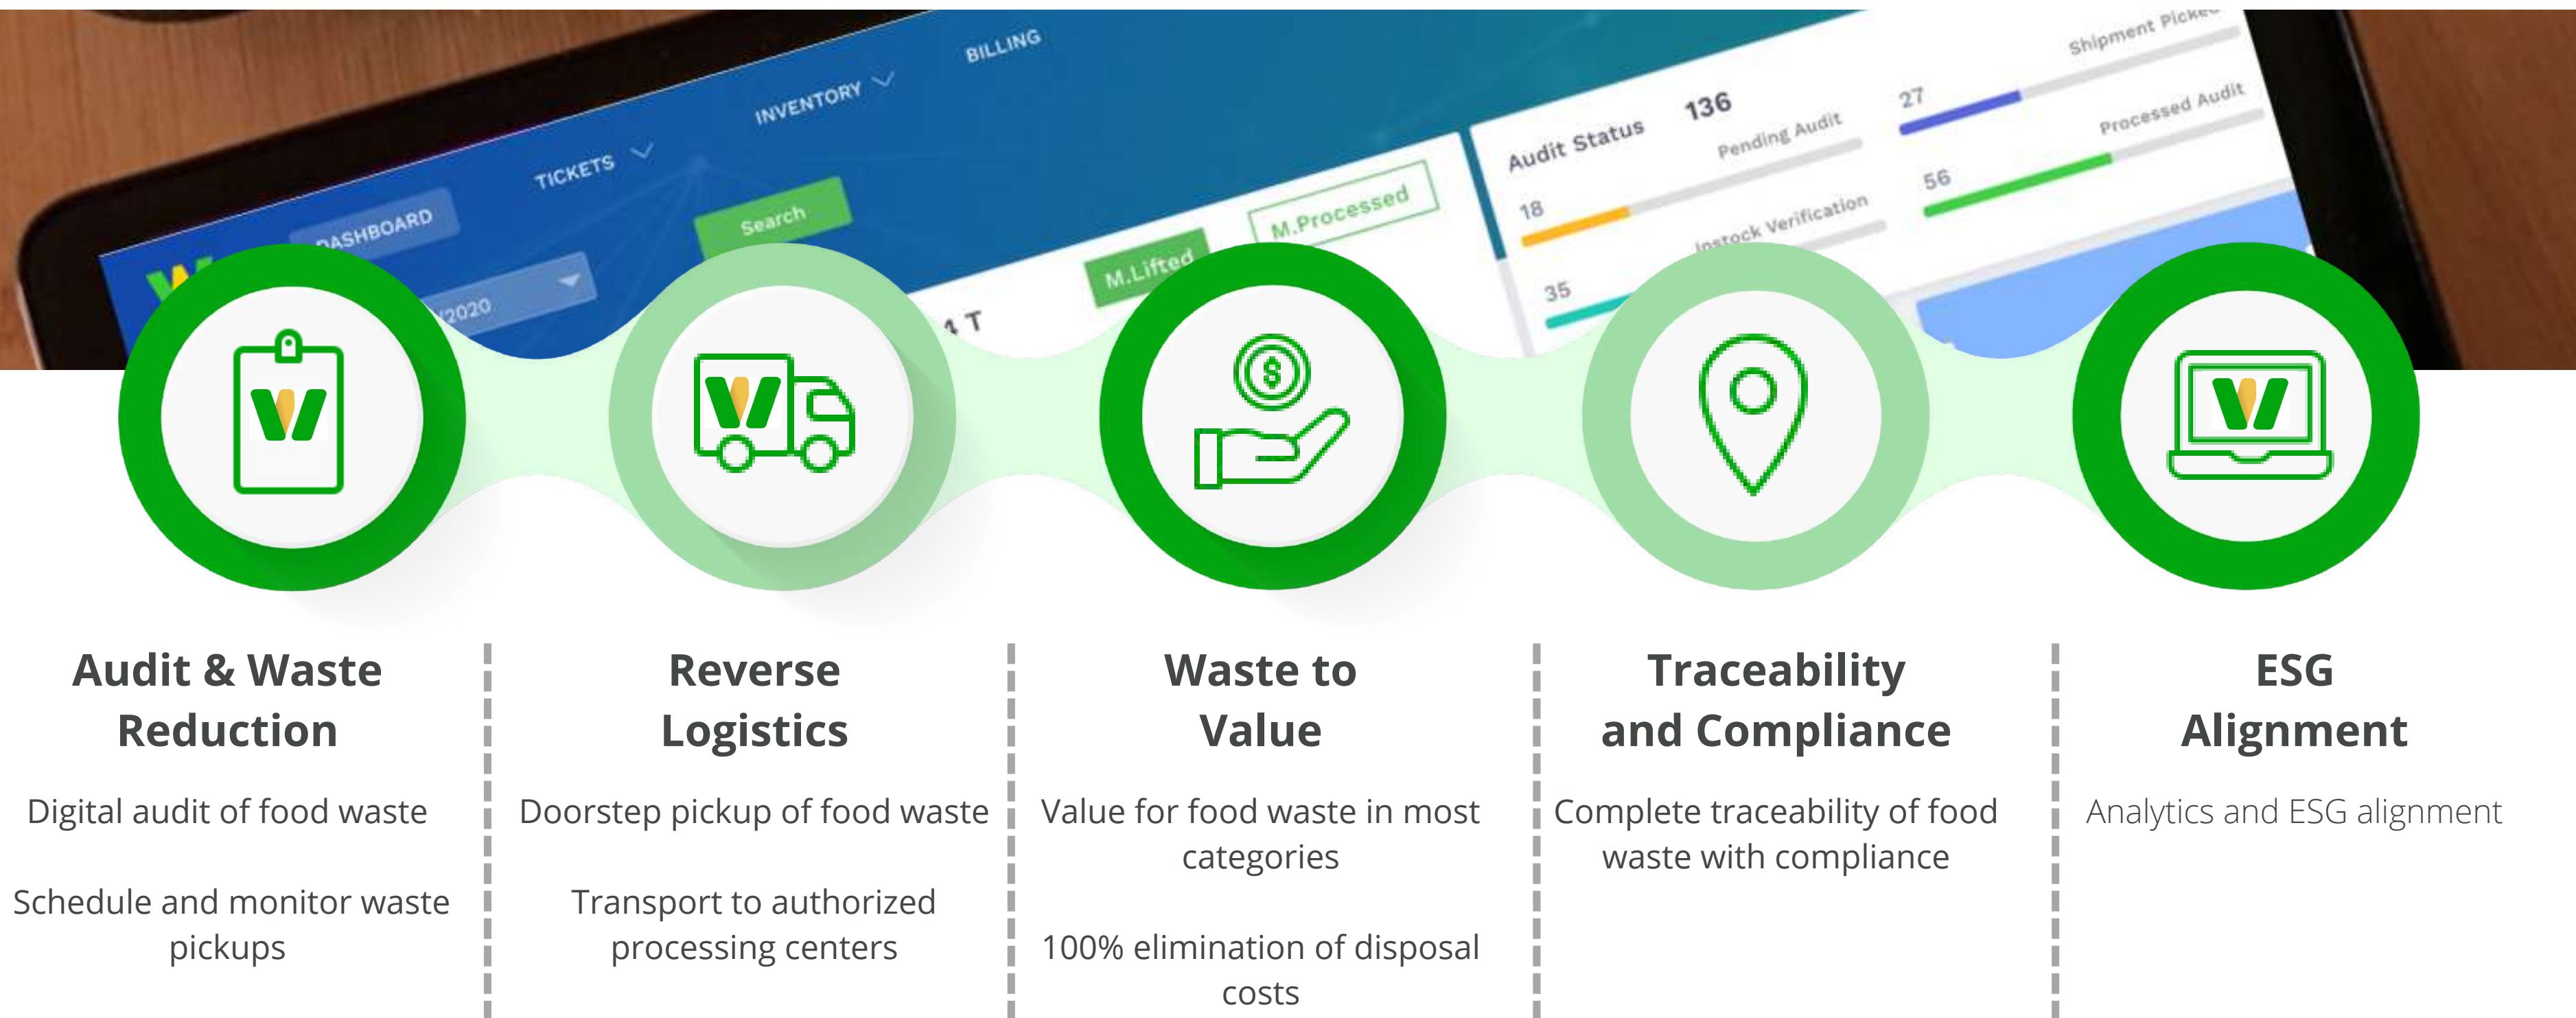

We are developing a tech platform and proprietary processing to capture value from food waste

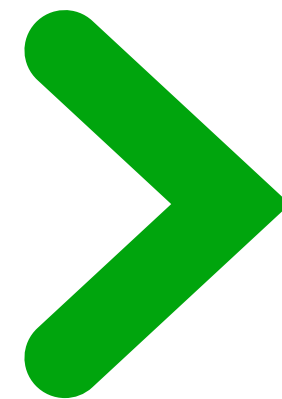

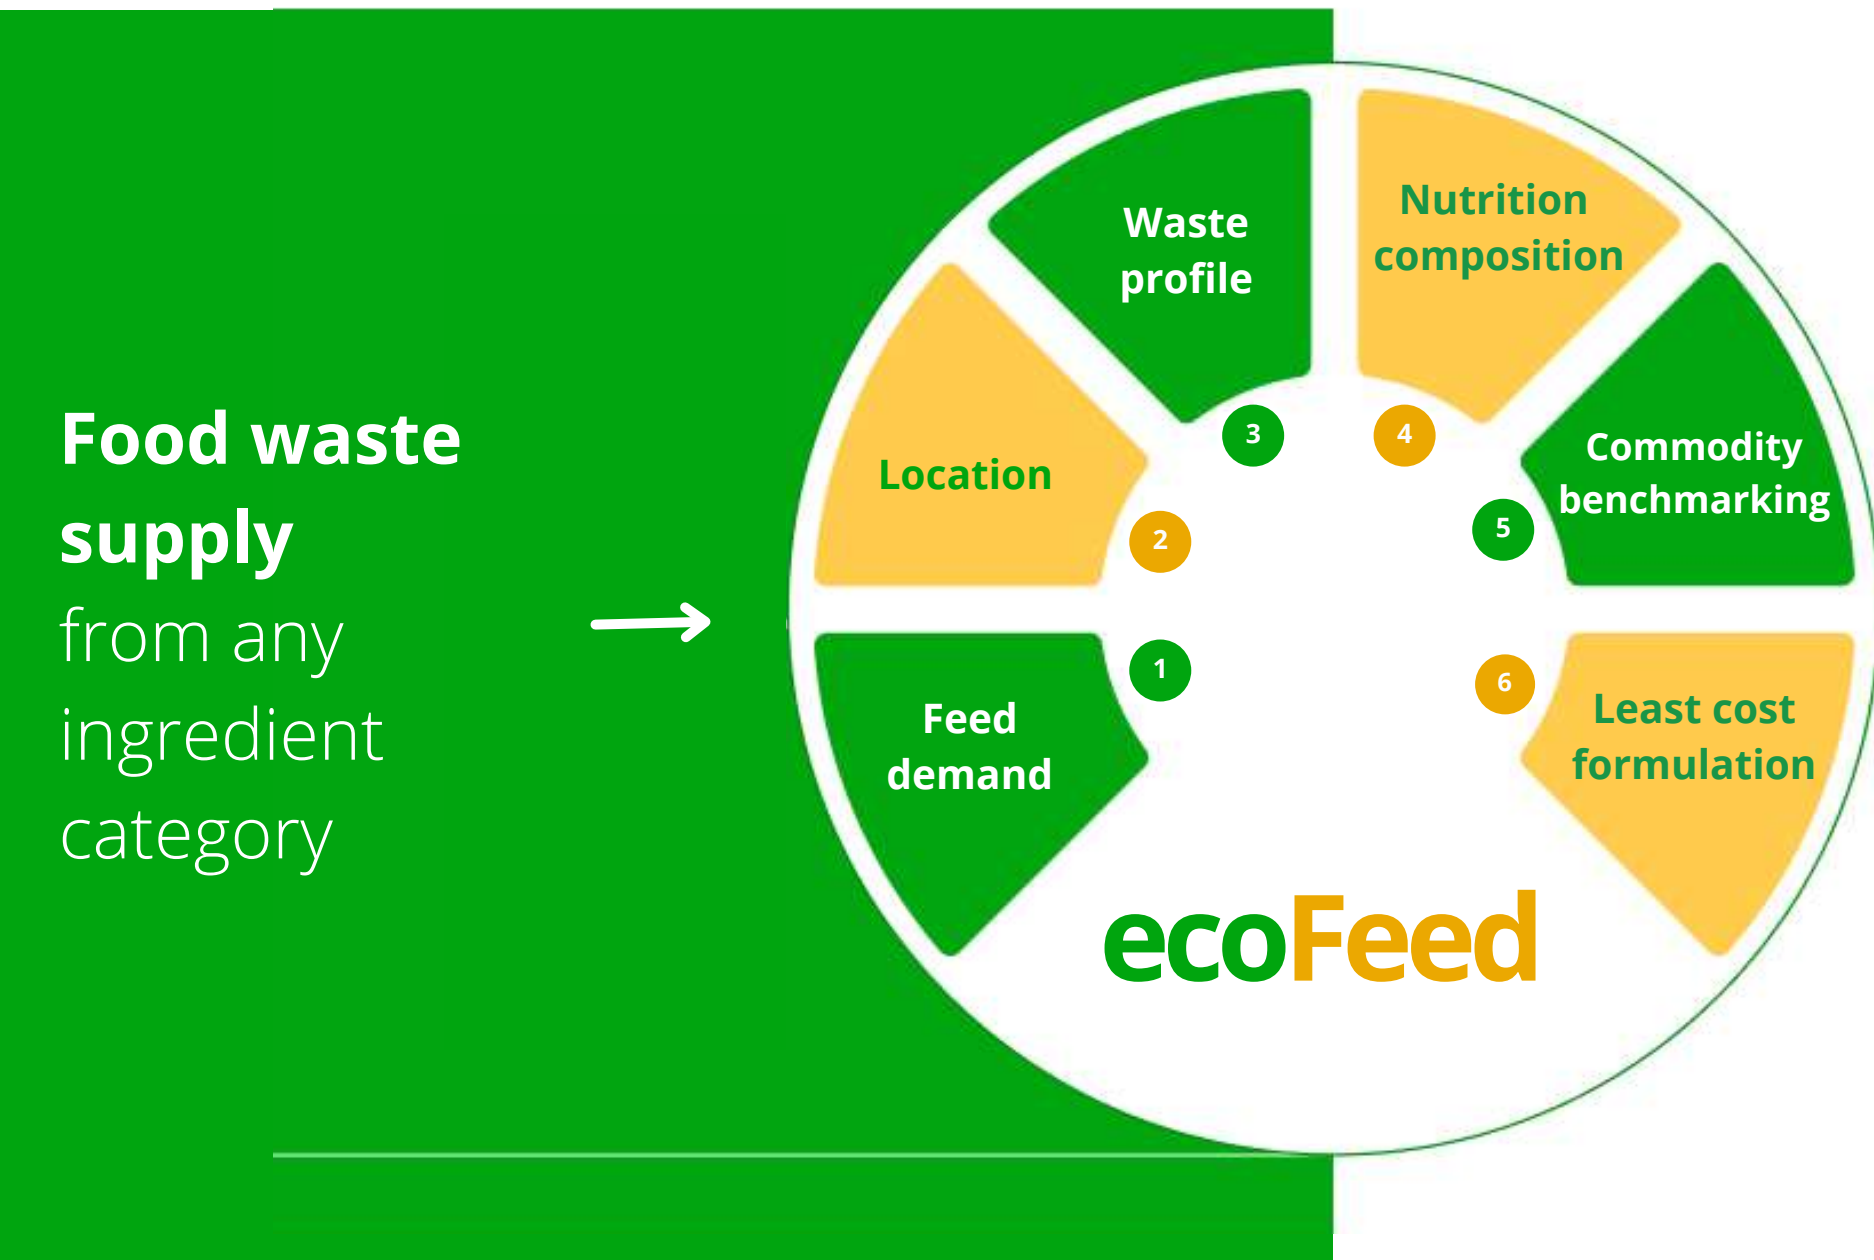

Our food producer platform digitizes reverse logistics, improves economics, and pioneers circular economy

Nutrition led processing unlocks value from food waste

Segregation

De-packing

Drying

Feed formulation

World's top food and feed brands trust what we do

WE ARE PROUD TO PARTNER WITH OUR CLIENTS TO BUILD A CIRCULAR ECONOMY

Food

Feed

Our traction proves that our model really works

Our business model pays food producers for their waste

Food Producers

2,000+

food producer locations

10,000 MT+

of food waste upcycled

Growth & Impact

3X

Y-o-Y growth

12 billion litres

Water consumption reduced

30,000 MT+

GHG emissions prevented

By 2025

1 Million MT

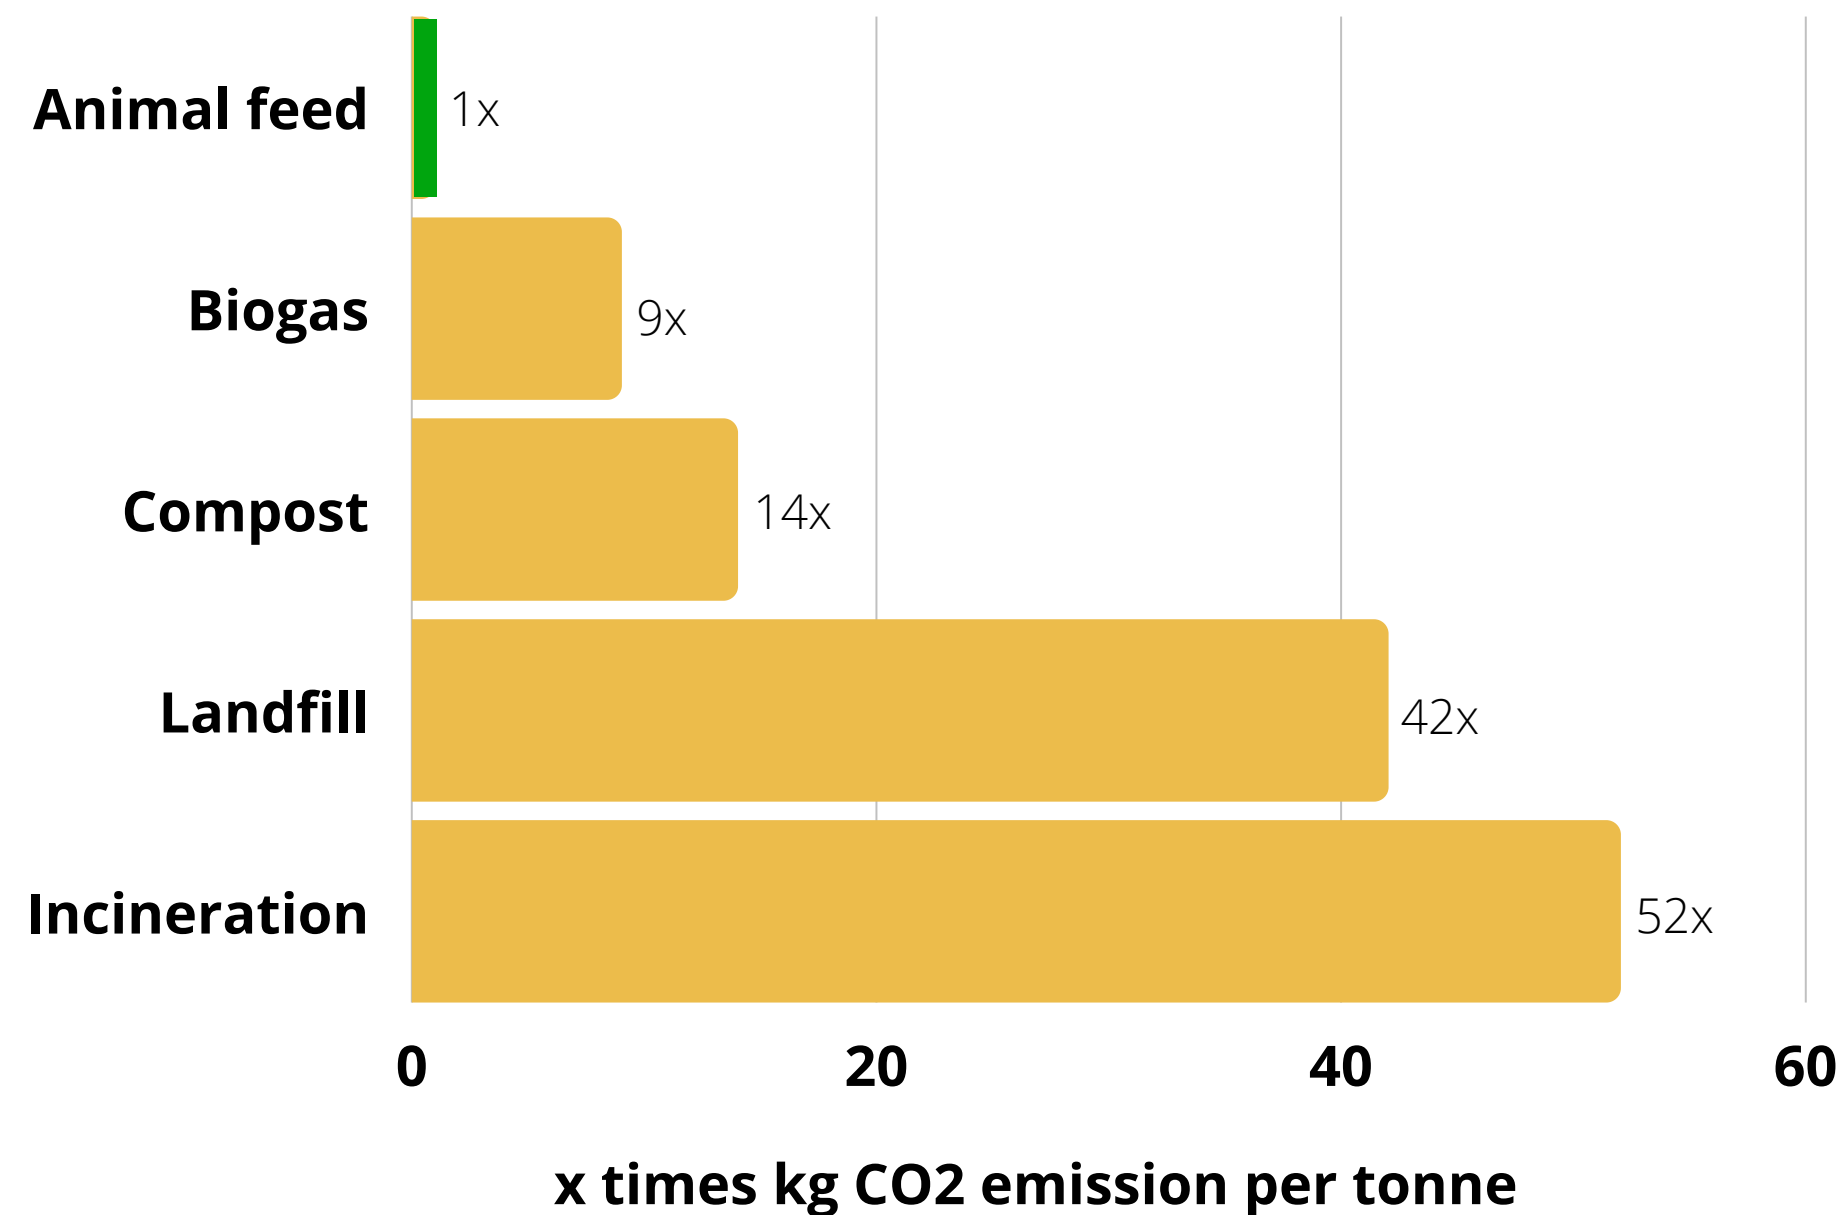

Food waste upcycled

3 Million MT

GHG emissions prevented

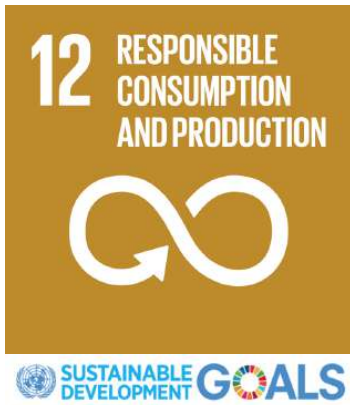

Climate crisis demands a rethink now for food waste management

Food to feed has the lowest carbon footprint

Every Ton of food waste upcycled saves up to 5 Tons of GHG emissions

We are supercharging India's transition to Net Zero

OUR BUSINESS MODEL CREATES PROFIT WHILE SAVING THE PLANET

We believe...

- Environment and business sustainability go hand in hand
- Concrete actions, not words, will solve climate change

We create...

- Environmental and social outcomes that help our food and feed partners run greener businesses
- One of its kind waste management infrastructure that reduces burden on the nation

We lead...

- India's vision of net zero carbon footprint by 2050
- Transformation of livestock farmer incomes

Culmination of a passion for climate and business
